

Our Green House noted in Glam-Granola book!

(November, 2007)

Our Green House is included in Glam-Granola Founder/Author Wendy Roy's "**You Know You're a Glam-Granola Girl If...**" book. The company is one of the book's elite, listed in the *Home/Living* category of its hot list directory.

This gift book is so much fun and smartly speaks directly to the large and multiplying demographic of "Glam-Granola" ladies through its bubbly, clever and sometimes downright insightful excerpts. The hot list, which contains the best of eco-fashion, eco-home, eco-beauty and more, is a bonus for the G.G. ladies.

Roy found Our Green House in her search for the cream of the crop in natural baby and home products. "It's so great that we have companies like Our Green House out there; this company is honest, and they bring us quality and trustworthy products that can help build a happy and peaceful home for the whole family", says Roy.

It is the perfect era for the book and Our Green House, as so many people are finally beginning to take an active interest in their (and the earth's) health and happiness.

The gift book will be available November, 2007. Glam-Granola's bath-body line and more are coming soon.
